PROJECT SUN STREAK

WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

PROJECT NUMBER: S1 TNG

SESSION NUMBER: 1

DATE OF SESSION: 880802

DATE OF REPORT: 880803

START: 1505

END: 1535

METHODOLOGY: CRV

VIEWER IDENTIFIER: 32

1. (S/NF/SK) MISSION: Access and describe in a stage one sense training target # 729, Mount Everest.
2. (S/NF/SK) VIEWER TASKING: Encrypted coordinates 2759/8707.
3. (S/NF/SK) COMMENTS: Interesting session. Training site folder #1033, Grand Canyon was in monitor's notebook. Target site folder #729, was in proper location on podium, coordinates were intended for #729. 032, however, accessed and properly decoded the Grand Canyon site and then after recueing, Mt. Everest. 032's structure was excellent.
4. (S/NF/SK) EVALUATION: 3.

Mt Everest

The highest mountain in the world. A peak of the great Himilaya, Mt Everest looms above the frontier between Tibet and Napal. Its elevation as of 1954 was between 29,028 and 29,040 ft. Local name of the peak is "CHOMOLUNGMA" or Goddess Mother of the World.

From the summit of Mt Everest, the Northeast Ridge descends to a shoulder, and from there the North Ridge falls to a saddle with the North Col below which the Rongbuk and the East Rongbuk glaciers flow northward into Tibet. The Southeast Ridge drops to the South Col, below which lies a basin called the Western Cwm, feeding the Khumbar glacier. This glacier turns southward in Napal. The Western Ridge runs down to a pass on the frontier. At the mountain's base the altitude is 17,000-18,000 ft. The North Col's altitude is 22,900 ft, the South Col is 25,850 ft. To date the Mountain has been climbed 35 times.
